PROFESSIONAL PROFILE

- 3rd year Honours Bachelor of Computer Science (Data Analytics) student exhibiting the ability to adapt, multitask, communicate, collaborate, innovate, and take initiative.
- Gained valuable problem – solving, detail – oriented, and time management skills through previous work experience.
- Prioritize writing clean, readable, and well documented code.
- Familiar with Big Data technologies in analyzing large datasets and databases.
- Proficiency in Data Analysis & Visualization tools for analysis, reporting, and interpretation of datasets.
- Possess an understanding of the Software Development Life Cycle.

TECHNICAL SKILLS

Programming Languages: Python, SQL (RDBMS), NoSQL, C# (.NET), R Programming, HTML, Hadoop, JavaScript, C, C++, Java

Tools/Libraries/Frameworks: Power BI, Pandas & NumPy, Scikit-learn, Matplotlib, Visual Paradigm, SAP, Visual Studio Code, MongoDB, Linux; Proficiency in Microsoft Suite (Word, Outlook, Excel, PowerPoint, Teams).

EDUCATION

Computer Systems Technology (SDNE)

September 2020 – December 2023

Sheridan College

- GPA: 3.81/4.0
- Courses: Cloud Computing, Web Development, Database Administration, Networking, Statistics

Honours Bachelor of Computer Science (specializing in Data Analytics)

September 2024 – Present

Sheridan College

- Current GPA: 3.82/4.0
- Courses: Statistics, Data Warehouse Design & Implementation, Data Structures & Algorithms, Machine Learning Techniques

PROJECTS

Study Helper Project | GDScript & Godot Programming (*Personal*, 2024)

- Developed a study aid application with an interactive question-answer system and self-grading functionality
- Created a framework to automatically generate mathematical based questions given a framework to insert the variables into
- Implemented a user-friendly interface with a structured course and week-based categorization for study module

2023 Capstone Project (Astroicide) | C++ & Unity Programming (*Academic*, 2023)

- Developed a first-person shooter game implementing mechanics such as an interactive world, physics-based movement, and AI-driven enemy behaviors
- Collaborated with a team of 4 members, using a Scrum methodology to manage sprints and refine the project
- Utilized GitHub as our version control tool of choice to streamline development and ensure proper code management
